

EPIC Track® App

Check people in and out of any event, from anywhere!

Perform a check in/out process of people or things using a small device.

Using the **EPIC Track App** from a smartphone, tablet, or other handheld device, users can check people in and out of any type of event from anywhere. Simply scan a person's 1 or 2D barcode, QR tag, or pdf7 barcode on their ID card using a mobile device such as a smartphone to instantly create a time stamp of when individuals enter an event, gather ID data, and push that information out to the Cloud for data storage within seconds. This process can also be used to check assets in/out to people by assigning an item to individuals as well.

Creating a new event is easy for the most inexperienced user. Gathering data takes seconds from a simple scan using the phone's built-in camera. Data is instantly delivered to the Microsoft Cloud making it easy for approved personnel to access and generate reports on that data from any PC with internet access.

Simple Steps to Track

In the **EPIC Track App**, users can choose from a series of drop down settings and connect lists to build individual event profiles within minutes. Link customizable fields to display data during the check in/out process used to shape each tracking scenario. Then simply scan ID barcodes to check people or items in and out of an event. At any time, users can choose from a selection of reports dynamically built from each tracking profile.

EPIC Track 2.2.8 Features

- > Easy to Deploy & Train Users
- > Cloud Hosted & Scalable
- > Configure Event Setup in Minutes
- > Identify Specific Locations
- > Countdowns & Count Threshold Limits
- > Custom Data Fields
- > Support Apple, Android & Windows
- > Instant Data Capture
- > Works On/Off-Line Anywhere
- > Connect your SIS to Upload Data
- > Assign Assets During Check-In/Out
- > Dynamic Reports Included
- > Instant Data Capture & Alerts at Check-in
- > Instant, Real-Time Data Shared at Checkpoints

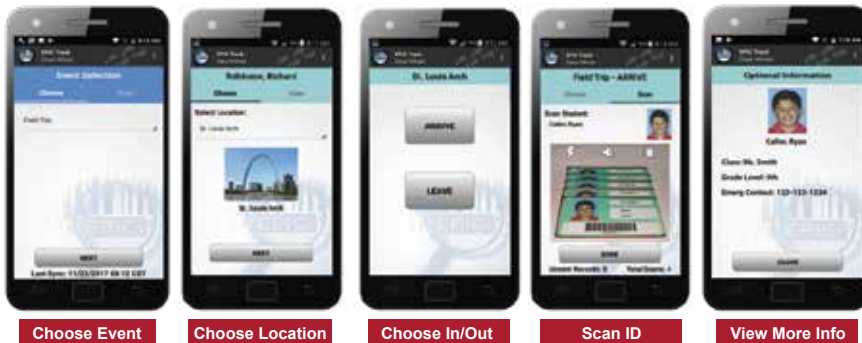

Maximized Connectivity

*The **EPIC Track App** connects wirelessly to the EPIC Track Server, which is hosted on an Internet Cloud. Mobile devices connect via public WiFi, local WiFi or cellular.*

*If a connection is lost or cannot be established, data collected & managed by the **EPIC Track App** is stored directly on the mobile device. Data can be synchronized once a connection is made.*

Easily navigate through the EPIC Track App to setup your event and begin scanning!

Multiple Tracking Devices Compatible with EPIC Track™ - Including Smart Phones!

EPIC Track™ is the perfect solution for K-12 School Districts to use when managing new school learning atmospheres supporting in-school and on-line learning. Expand your identification program by tracking student assets, temperature readings, and check in/out when entering a bus or school premises. Setup scanning stations 6' away from personnel or with mobile devices such as smartphones, tablets, handhelds or RPC at entrances.

Track specific details for COVID contact tracing using the EPIC Track™ Solution by identifying which student is on which bus, classroom, recess, etc., including a time stamp, by scanning student/staff IDs and collecting event data.

Functionality

- > Scan with a network (Ethernet) scanner at cafeteria lines using EPIC to collect data and connect to SIS software to document visit.
- > Use a mobile handheld, tablet, phone, or RPC to collect data.
- > Nursing staff selects symptoms from a drop down list and scans each student ID to document a nurse visit and track school-wide trends.
- > Track temperature checks at bus stops or school entrances by assigning a temperature reading to each student after thermal scans.
- > Track tardies from a mobile app or tethered scanner at a PC set to kiosk mode for contactless scanning.
- > Checkout PCs, hot spots, tablets, etc to students by scanning PC ID tag and student ID.
- > Use one or multiple handhelds/phones to perform tracking.
- > Check the status of an event in progress and generate reports.
- > Customize each event or tracking scenario.

Tracking Events

- > School facility access
- > Classroom & lab attendance
- > Students on buses
- > Temperature checks
- > School tardies
- > Computer lab attendance
- > Evacuation
- > Club meetings
- > Faculty meetings
- > Detention attendance

Asset Check In/Out

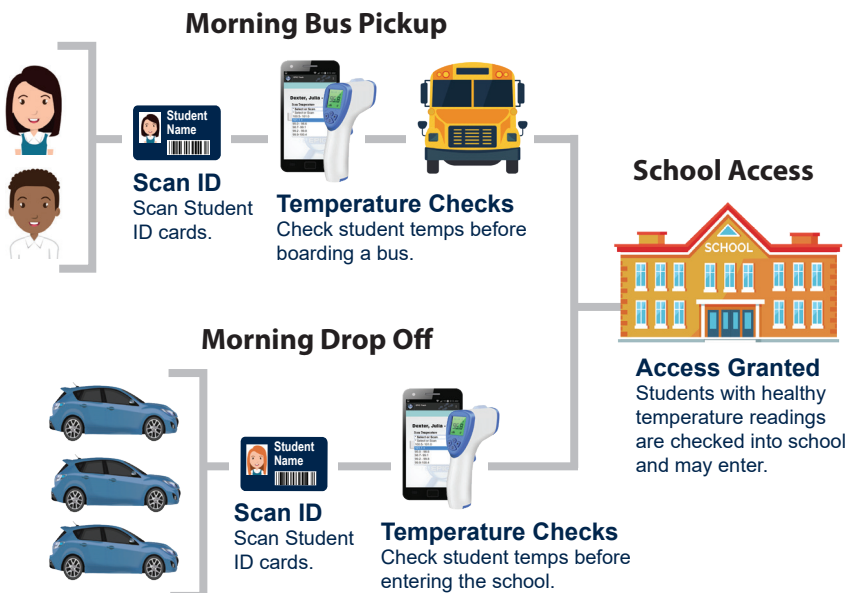

- Check items in/out and assign to students or staff such as:
- > Tablet devices
 - > Lab equipment
 - > Instruments
 - > PCs, laptops, projectors, etc.
 - > Books
 - > Sporting equipment
 - > School/maintenance equipment

Accountability

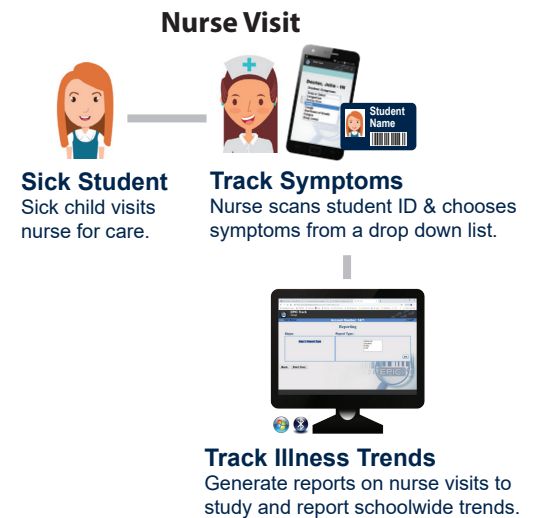

- > Track temperature readings at checkpoints
- > Track student symptoms during nurse visits
- > Generate reports to perform COVID contact tracing
- > Track student attendance
- > Track faculty attendance
- > Know who got on/off a bus
- > Measure student participation
- > Assign staff to students
- > Assign a location to student/staff
- > Assign an asset to student/staff

Benefit by having greater accountability for students while they're in your hands.

EPIC Track™ Sick Child Scenario

EPIC Track™ Asset Issuance Scenario

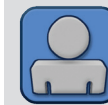

Features of EPIC Track

Status Check

Check real time status of activities in your event from anywhere.

Manage Users

Give users access to features they need without access to ones they don't.

List Management

Build lists or connect to an existing databases containing people, places & things you want to track.

Tracking Events

Build custom tracking events quickly & easily with no custom programming.

Reports

Generate online reports dynamically built on customized tracking events.

Account Configuration

Approved Administrators may manage event settings and control visualized data.

EPIC Track is compatible with operating systems such as:

iPad and iPhone are trademarks of Apple.

EPIC Track™ Contactless Scanning Options
